

# Mònica Grau González

Vet Surgeon

## Profile

I am a dedicated, organised and methodical veterinarian. I am an excellent team worker but I am also capable to work on my own. I like setting myself goals to achieve. I have good listening, communication and interpersonal skills. I really enjoy taking care of animals and I am good dealing with them.

I have special interest in feline medicine, but I like to learn about any different animal species. I am always willing to develop new skills.
